# MONTHLY DIGEST OF STATISTICS

No. 244

APRIL 1966

This Digest has been prepared by the Central Statistical Office in collaboration with the Statistics Divisions of Government Departments.

2. The name of the department or organisation providing the statistics is shown under each table. Some of the statistics provided by departments are actually collected by other organisations such as nationalised boards and trade associations. The assistance provided by these organisations, too numerous to mention individually, is gratefully acknowledged.

3. The figures in the Digest are mainly totals for calendar months or monthly averages.

4. Some of the figures included in this Digest are provisional only and may be revised in later issues.

## Definitions

5. A Supplement of Definitions and Explanatory Notes, published with the January issue, gives detailed definitions of all the terms and units used in the Digest.

6. The following general definitions should be noted in using the Digest:

**Area covered.** Except where otherwise stated, all statistics relate to the United Kingdom of Great Britain and Northern Ireland.

### Units of measurement.

Ton = long ton of 2,240 lb.

Gallon = imperial gallon.

**Consumption and stocks.** The terms 'consumption', 'disposals' and 'stocks' are normally defined in detail in the Supplement to the Digest. Figures of consumption and stocks are seasonal and should be used with caution. The stocks figures given may often relate to only part of the total stocks in the country.

**External trade.** Owing to differences in coverage and timing, figures of imports and exports are not always comparable with those for production, consumption and stocks.

## Symbols and conventions used

7. **Symbols.** The following symbols are used throughout:

... not available.

— nil or less than half the final digit shown.

\* average (or total) of five weeks.

8. **Change of basis.** A line drawn across a column between two consecutive figures indicates that the figures above and below the line have been compiled on different bases and are not strictly comparable. In each case a footnote explains the difference.

9. **Rounding of figures.** In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

## Change in content

10. **Table 11A. Estimated future total population of the United Kingdom.** This table is included for this issue only and in order to include it the table on Civil Service staff (Table 17 in the March issue) has been omitted.

The projection has been prepared on the basis of the following assumptions:

**Mortality:** Death rates at the outset based on recent experience. At ages under 40 death rates are assumed to decline over the period of the projection until, at the end of forty years, they are one-half or less of the rates now being experienced. At ages over 40 the assumed rates of decline become progressively smaller as the age advances until they vanish at ages over 90.

**Births:** The estimates assume 1,004,000 live births in the year mid-1965 to mid-1966 and a gradual increase thereafter to 1,090,000 in 1970, to 1,159,000 in 1980, to 1,382,000 in 1990 and to 1,565,000 in 2000. The ratio of male to female births has been taken as 1.06 for Great Britain and 1.07 for Northern Ireland.

**Migration:** A net inward migration of 10,000 a year up to and including 1970, declining to nil in 1975 and later years. The net inward migration is assumed to comprise about 40 per cent. males and 60 per cent. females.

The births now assumed at the outset are lower than those assumed in the corresponding Table 12A in the April 1965 Monthly Digest, but from 1970 onwards they are higher, despite the fact that the net inward migration for which allowance is made is less than in last year's projection. Births in 1965 were fewer than in 1964, the first occasion on which births have been less than in the previous year since 1955, but it is not yet clear whether this is more than a temporary fluctuation, and it was therefore decided to make no change in the birth assumption for the non-migrant population from 1971 onwards. Births from 1966 to 1970 were, however, adjusted downwards to give a smooth progression from the actual 1965 births to the assumed 1970 level. Last year's projections allowed for a small excess in the fertility of immigrants over that of the existing population, but results now available from the 1961 Census suggest that this allowance was insufficient, and a larger allowance has now been made. In addition, a greater proportion of immigrants are now assumed to be young women. As a result of these two factors the adjustment to the assumed births on account of migration is greater than last year. This applies even after 1975, when no net migration is assumed, for, though the numbers of immigrants and emigrants are equal, the former are assumed to have markedly higher fertility than the latter.

(<sup>1</sup>) Rent, rates, water charges and expenditure by occupiers on repairs, maintenance and improvements.

(<sup>2</sup>) This series is subject to a wide margin of error because of the difficulty of separating business from personal expenditure. It is shown separately because quarterly variations have such an important influence on changes in the total of consumers' expenditure and on personal saving.

Temporarily stopped <sup>(2)</sup> ...	8	10	25	19	5	5	6	11	11

(1) The table covers all persons aged 15 and over at work or registered as available for work. Part-time workers are counted as full units. The industry groups are those given in the Standard Industrial Classification 1958.

Source: Ministry of Labour

Figures after June 1965 are provisional and may be revised after the count of national insurance cards at mid-1966.

(2) Most, if not all, persons registered as temporarily stopped are on the pay-rolls of employers and included in the numbers of employees in employment.

(3) Owing to re-classification at June 1964, figures for earlier years are not strictly comparable. See page 59 of the February 1965 issue of *Ministry of Labour Gazette*.

† A revised method for the calculation of employment estimates has now been introduced (see the March 1966 issue of *Ministry of Labour Gazette*). Figures for June 1964(b) and later months are on this revised basis while those for June 1964(a) and earlier dates are on the former basis.

(1) Figures relate to establishments with more than 10 employees in all manufacturing industries except shipbuilding and ship repairing. Until May 1961 they relate to establishments rendering employment returns. From May 1961 they include an allowance for those not rendering returns.

Source: Ministry of Labour

(2) Figures from 1960 are based on the Standard Industrial Classification, 1958.

(3) Excluding maintenance staff.

(4) Operatives stood off for the whole week are assumed to have been on short-time to the extent of 45 hours each until November 1960 and 42 hours thereafter.

(<sup>1</sup>) Stoppages involving fewer than 10 workpeople or lasting less than one day have been omitted except any in which the total number of working days lost exceeded 100.

(<sup>2</sup>) From 1960 the analysis by industries is based on the revised Standard Industrial Classification, 1958.

(<sup>3</sup>) Where stoppages extend over more than one month, the workers involved are counted in the month in which they first participated.

(<sup>4</sup>) The figures of working days lost relate to the total working days lost within each of the periods shown as a result of stoppages in progress in that period, whether the stoppages began in that period or earlier.

(1) Figures for individual months are averages of the four or five weeks ending on the last Tuesday of each month. (2) Including prescribed industrial disease.

Source: Ministry of Pensions  
and National Insurance

(3) Monthly figures relate to the third Tuesday of each month. Yearly figures are averages of twelve monthly figures.

(4) These figures include substantial numbers of persons who have been sick for a long time and who may no longer be in employment.

(5) Yearly figures are averages of quarterly figures. Quarterly figures relate to first Monday in February, May and November and last Monday in July.

(6) Including a diminishing number of widows with pensions of 30s. a week derived from the old Contributory Pensions Acts. About 77,000 such pensions were being paid in June 1965.

(7) Before 5 August 1957 widow's pension was converted to retirement pension at age 60; since that date widow's pension continues to age 65 or date of retirement if earlier. (8) The yearly figures relate to the end of January in the following year up to 1963, and to the end of December from 1964.

(9) Including the elder or eldest child for whom no allowance is payable but excluding children over the age limit.

\* Average of five weeks.

(1) The authorization of a weekly allowance payable to a person registering as unemployed remains in force for a time after the person last registers. The figures given include persons no longer unemployed on the day to which they relate. For explanation of the difference between these figures and those in Table 24, column 4, see the note on page 38 of the Report of the National Assistance Board for the year 1964 (Cmnd. 2674).

(2) Some of the allowances provide for the requirements of a household with more than one pensioner.

(3) Before March 1961, the figures for allowances in supplementation of widows' benefit relate only to widows aged under 60, older widows being included with the retirement pensioners. The figure for March 1966 includes 44,000 recipients of widows' benefit, aged over 60.

(1) Excluding agricultural holdings of one acre or less in extent in Great Britain. In Northern Ireland excluding holdings of less than one acre.

Sources: Agricultural Departments

(2) Gross production figures are shown for England and Wales and Northern Ireland and harvested production figures for Scotland.

(3) Weight in pod. (4) Shelled weight. (5) England and Wales only.

(6) Production figures relate to hay only. The production of hay in England and Wales is calculated from the area cut for hay and actually harvested and does not include the area mown for silage, drying or seed; the production of hay in Scotland is calculated from the area cut for hay only and does not include grass mown for silage or drying.

(7) Clover and rotation grasses. (8) Including hay from permanent grass in Scotland.

(9) Including the total area of deer forest land in Scotland.

(<sup>1</sup>) Sales through the Milk Marketing Schemes. (<sup>2</sup>) Figures are based on milk usage. From January 1965 the figures relate to calendar months. (<sup>3</sup>) Excluding farm production. (<sup>4</sup>) Stocks held in cold storage. From January 1964 the coverage differs slightly from earlier years. (<sup>5</sup>) Whole and skimmed. Excluding skim concentrate and condensed milk used in the manufacture of chocolate crumb. (<sup>6</sup>) Skimmed powder excludes buttermilk and whey powder. (<sup>7</sup>) Stocks held by main importers, manufacturers and factors. From January 1965, the figures include stocks of farmhouse cheese. (<sup>8</sup>) Stocks held by manufacturers only; importers' stocks not known. (<sup>9</sup>) 53 week period.

(1) This index provides a general measure of monthly changes in total industrial production. The unadjusted index allows for variations in the length of calendar months so that it gives the average weekly rate of production in each month. The seasonally adjusted index allows for holidays and regularly recurring seasonal movements.

Source: Central Statistical Office

As some of the figures on which the index is based are available only with considerable delay, the index numbers for the last few months are always liable to be revised. Industries are grouped according to the Standard Industrial Classification, 1958.

(2) For an index of construction (new work only) for Great Britain, see Table 105.

(3) Provisional.

(1) Stocks held in Northern Ireland are excluded.

(2) Including shipments to Northern Ireland and the Channel Islands.

(3) From 1963, the figures relate to exports only.

(4) From July 1963, the opencast figures include the production of certain licensed sites previously included in the deep mined figures.

\* Average of five weeks.

(1) Mines operated by the National Coal Board which account for about 99 per cent. of the total output. Changes in the basis of the recorded figures have occurred from time to time making comparisons difficult. The figures given in this table have therefore been adjusted where necessary to conform throughout to the current definitions given in the *Supplement of Definitions and Explanatory Notes*.

(1) Excluding coke breeze.

(2) Excluding coke used for heating retorts at gas works.

(3) Including shipments to Northern Ireland.

(4) Figures relate to actual shipments made in each period and owing to the time lag between the date of shipment and the notification to H.M. Customs they differ from the figures published in the Trade Accounts.

\* Average of five weeks.

(<sup>1</sup>) Excluding quantities used for production of steam for sale. In 1965, 245,000 tons of coal and 13,000 tons of oil were used for that purpose.

Sources: Ministry of Power  
Scottish Development Department

(<sup>2</sup>) Including generation by oil engine, refuse destructor, and waste heat.

(<sup>3</sup>) Including purchases from industrial producers whose generation is shown in Table 53, and net imports from France.

(<sup>4</sup>) Annual figures relate to the maximum load occurring near the end of the year or early in the following year.

## Generation of electricity outside the public electricity supply system

Great Britain

Weekly averages

Million kilowatt hours

(1) Before 1963 figures for paint and varnish relate to sales by manufacturers employing more than 10 persons in 1954, but from 1963 to sales by manufacturers employing 25 or more persons at the beginning of that year.

Source: Board of Trade

(2) From January 1963 including clear solutions and pigmented cellulose paints.

(3) From January 1963 the figures relate to spirit-based varnishes, lacquers and stains only.

(1) Industrial ethyl alcohol made from molasses and derived from other processes.

(2) Figures before 1962 have been partly estimated.

(3) Figures include estimates computed from figures for calendar months.

(4) Figures before July 1963 relate to production of manufacturers employing 10 or more persons but from July 1963 to production of manufacturers employing 25 or more persons.

(1) The iron content of home produced iron ore is about 27 per cent. and of imported iron ore about 58 per cent.

Source: Ministry of Power

(2) Excluding consumption of refined and cylinder iron made otherwise than in blast furnaces.

(3) At steel works, steel foundries and blast furnaces.

(4) At steel works and steel foundries.

(5) Ingots, metal for continuously cast blooms, billets and slabs and metal for castings.

(6) Stocks at producers' works of alloy and non-alloy ingots, semi-finished and finished steel in terms of ingot equivalent.

(7) Including imports (and material for manufacture of drop forgings) but excluding deliveries of all material for intra-industry conversion.

(8) 53 week period. \*Average of five weeks.

(1) Lead reclaimed from secondary and scrap material, and lead refined from domestic ores.

(2) Including lead imported for processing on toll.

(3) Including production from imported scrap and residues refined on toll.

(4) Including toll transactions. (5) Including the pure content of virgin alloys.

(6) Excluding virgin content used in the production of secondary metal.

(1) Completions are actual tonnages; other tonnages are approximate.

(2) Before 1961 export figures exclude ships for Commonwealth registration.

(\*) Before 1962 only cancellations are covered. Modifications include alterations to the tonnage and the country of registration of vessels already on order.

(\*) Modifications and cancellations exceed new orders for the period.

(<sup>1</sup>) Wool, hosiery (and other knitted goods), made-up clothing and the spinning, weaving and merchant converting sections of the cotton and man-made fibre industries. (<sup>2</sup>) The index numbers for individual sectors relate to the total output of manufacturers whose main business is in that sector of the industry and not output of that particular type of garment.

(<sup>3</sup>) These indices have been adjusted to allow for differences in the lengths of calendar months but not for holidays or for other seasonal variations.

(1) Measured in thousand piled cubic fathoms. 1 piled cubic fathom = 1.8 tons (air dry weight).

(2) Including home-grown pulpwood, wood waste, chippings and rejected pitprops.

(3) From June 1962, figures include other vegetable fibres.

(4) Including woodpulp for cellulose wadding. Excluding government stocks.

(5) For the manufacture of rayon and transparent cellulose film.

(6) 53 week period (except for woodpulp).

(7) 53 week period.

\* Average of five weeks.

(1) The figures for new orders were collected on a new basis in 1964 and adjustments have been made to some of the figures to make the series continuous and bring them into line with output figures.

Source: Ministry of Public Building and Works

(2) These figures relate to work included in the preceding columns which is to be done without a firm order.

(3) Including garages and shops.

(4) Including gas, electricity, coal-mining, railways and air transport.

(<sup>1</sup>) The table includes new buildings and extensions to existing buildings, mainly over 5,000 square feet, in manufacturing industry. Industrial building approved from 1 January 1959 follows the definition of Manufacturing laid down in the revised Standard Industrial Classification, 1958.

(<sup>2</sup>) Schemes for replacement of buildings destroyed by fire or enemy action are excluded prior to July 1948.

(<sup>3</sup>) Figures for the 1st and 2nd quarters of 1965 are partly estimated. This addition is not included in the figures of under construction and completions for the Standard Regions.

(<sup>1</sup>) Excluding building which is wholly financed from private sources. (<sup>2</sup>) From January 1960 for Scotland and from April 1960 for England and Wales the cost of school meals projects has not been separately recorded. The value of such projects, shown separately for the years 1946 to 1959 in previous tables of educational building, has been included as appropriate under the headings 'Primary and secondary' and 'Special schools'. (<sup>3</sup>) Figures for England and Wales include the value of projects for which specific approval is not required. (<sup>4</sup>) Totals for England and Wales include the value of certain projects for which no analysis between type of project is available. As from October 1961, the individual value of such projects is less than £2,000. (<sup>5</sup>) Figures for England and Wales relate to project values and those for Scotland to contract values. Figures for Scotland include the cost of certain minor projects for which specific approval is not required. (<sup>6</sup>) This figure takes account of the value of Colleges of Advanced Technology projects transferred to the University Grants Committee on 1 April 1965. (<sup>7</sup>) The Scottish figures of projects approved refer to approval at the sketch plan stage, which might be some six to twelve months before the start of construction, except those for the period from January 1954 to December 1959 which refer to tenders accepted for approved projects. (<sup>8</sup>) The Scottish figures of 'Under construction' and 'Completions' are based on the tender costs, but from January 1954 to December 1959 the figures of 'Completions' are adjusted in respect of any difference between the tender and final costs as the latter become known. The 'Under construction' and 'Completions' figures exclude the value of approved school projects which in 1964 amounted to £430,000 and £33,000 respectively.

(1) The method of calculation of the number of new places provided differs in England and Wales and Scotland. In England and Wales the figures refer to the number of pupils for which new school accommodation is designed. In Scotland the figures refer to the sum of the approved capacities of all the teaching rooms whether classrooms or practical rooms, and will normally exceed the number of pupils for which accommodation is designed.

Sources: Department of Education and Science  
Scottish Education Department

(2) Including new schools brought into partial use before completion.

(3) Extensions, alterations, remodelling and war damage repairs.

(1) Excluding Service vehicles.

(2) Including pedestrian-controlled delivery vans.

(3) Buses, coaches, trolleybuses, taxi-cabs and private hire cars. Tramcars are excluded.

(4) Showmen's tractors and special vehicles, local authorities' watering and cleansing vehicles and tower wagons.

(5) Figures relate mainly to invalid vehicles and snow ploughs, other exempt vehicles being included under the appropriate headings.

(1) 1965 figures include revised estimates of the trend in goods vehicle traffic.

Sources: Ministry of Transport

(2) The railway figures up to December 1962 are derived from statistics compiled by the British Transport Commission and from January 1963 from statistics compiled by the British Railways Board. The figures for road transport are estimated from a sample enquiry and traffic counts. This index is adjusted so as to give the average four-weekly rate in each month.

Road Research Laboratory

(3) Not over 30 cwt. unladen weight.

(4) The monthly figures have been amended to take into account the results of the 1962 Survey of road goods transport.

(1) The four-weekly averages for each year are computed from calendar year totals.

(2) The reduced fares category includes statutory day returns in the London area. From January 29, 1966, Full fares and reduced fares have been combined for London Transport railways.

(3) Season ticket journeys are calculated on the basis of 600 journeys per annum for London Transport, and before 1962 for British Railways. From 1962 the basis used for British Railways is 540 journeys per annum.

(1) The four-weekly averages for each year are computed from calendar year totals.

(2) Up to and including 1962 the figures are based on miles actually hauled and include free-hauled traffic except that hauled by departmental trains. From the beginning of 1963 they are based on miles charged for and exclude all free-hauled traffic.

(1) Scheduled services only. Miles are statute miles.

(2) Including estimates computed from figures for four and five weekly periods.

(3) Including services between Great Britain and Northern Ireland, the Isle of Man and the Channel Isles.

(4) Including weight of vehicles carried on vehicle ferry services, excess baggage and diplomatic bags.

(5) Short tons of 2,000 lb.

(<sup>1</sup>) Excluding movement by land across the frontier between the Irish Republic and Northern Ireland, passengers travelling between the Channel Islands and Great Britain, passengers carried in aircraft chartered by British government departments and, as far as possible, passengers travelling by sea on pleasure cruises and day trips, and H.M. and other Armed Forces travelling in the course of their duties. Including movement to and from the privately operated airports of Southend and Ferryfield.

(<sup>2</sup>) Passengers to and from North Africa and Middle East countries have been attributed to the European continent and Mediterranean Sea area from 1960 onwards in the case of air traffic and from 1961 onwards in the case of sea traffic.

(1) Assets: increase —, decrease +. Liabilities: increase +, decrease —.

Source: Central Statistical Office

(2) Also includes changes in U.K. liabilities in non-sterling currencies (net), in official holdings of non-convertible currencies, and from the beginning of 1963, in U.K. banks' liabilities in overseas sterling area currencies (net). Before 1963, liabilities in overseas sterling area currencies formed part of overseas sterling holdings.

(\*) Excluding liabilities to the I.M.F. Figures for periods before 1963 are changes in the net total of overseas sterling holdings (other than by the I.M.F.) and sterling acceptances outstanding.

(1) The exchange rates for Australia, New Zealand, South Africa, Bombay and Karachi were:

Source: Bank of England

Australia (£A to £100) (selling rate): 125 to 13 February 1966. From 14 February 1966 a new unit—the dollar—was established on the basis of £A1=\$A2. The new selling rate (\$A to £100)=250.

New Zealand (£NZ to £100) (selling rate): 100.375 throughout.

South Africa (£SA to £100) (selling rate): 1956 to 13 February 1961, 99.875. From 14 February 1961 a new unit—the Rand—was established on the basis of £SA1 = Rand 2.

The new selling rate (Rand to £100) = 199.75.

Bombay (pence per rupee) (averages of daily mean rates): 18.00 throughout.

Karachi (pence per rupee) (averages of daily mean rates): 18.00 throughout.

(2) Quoted in units of 100 francs to £ from 29 December 1958 to 31 December 1959. From 1 January 1960 a new unit was established equivalent to 100 old francs.

(3) 10.598 to 4 March: no quotation 6 March: 10.085 from 7 March.

(4) 11.694 to 3 March: no quotation 4 March: 11.167 from 6 March.

(5) 2.9492 to 2 May: 3.0278 from 3 May.

(1) The yearly totals include revisions which cannot be allocated to particular monthly periods. The monthly periods end on the last Saturday of the month except the quarter months which end on the last day of the month.

Sources: Board of Inland Revenue  
H.M. Customs and Excise

(2) The sum of the twelve monthly receipts under certain headings is slightly greater than the total shown for the financial year. This is because the monthly figures include duties ultimately payable to the Isle of Man and adjustments for these are made only at the end of the financial year.

(3) Including receipts from the 10 per cent. surcharge on most Customs and Excise duties and on purchase tax, which was operative from 26 July 1961 to 9 April 1962.

(4) Including excess profits levy.

(5) Land tax, mineral rights duties, excess profits duty, corporation profits tax and special contribution.

(6) Including receipts from the temporary charge on imports from October 1964 less export rebates.

(7) Provisional.

(<sup>1</sup>) Total deposits less (i) balances with, and cheques in course of collection on, other banks in the United Kingdom and the Republic of Ireland and (ii) items in transit between offices of the same bank.

(<sup>2</sup>) Comprising (i) Coin, notes and balances with Bank of England, etc. (excluding special deposits); (ii) Money at call and short notice; (iii) Bills discounted. From February 1961, Liquid assets include, and Advances exclude, re-financing export credits. In 1961, certain assets were re-classified and approximately £40 million was transferred to Liquid assets from Advances.

(<sup>3</sup>) Deposits called under the Special Deposits Scheme and not at the banks' free disposal.

(<sup>4</sup>) Excluding items in transit. See also footnote (<sup>2</sup>).

(1) Figures are not strictly comparable throughout owing to changes in the composition of the clearings.

Sources: Bank of England  
Bankers' Clearing House

(2) Average of Wednesdays. Includes Bank of England notes held by the Scottish and Northern Ireland banks as cover for their note issues in excess of the authorised circulation.

(3) Months: average of Saturdays in the consecutive four-week periods as published in *The London Gazette* or in *The Belfast Gazette*, with as close a correspondence as possible to the calendar months. Years: average of the thirteen published figures.

(4) Excluding coin in the Bank of England, Issue Department.

(5) Total notes and coin outstanding, less notes and coin held by the Bank of England, Banking Department, and by the London clearing banks, Scottish banks and Northern Ireland banks.

(6) From commencement of credit clearing on 20 April 1960.

(1) Average of working days, excluding accrued interest and ignoring income tax. In calculating the yields on securities with more than one maturity date, redemption is assumed at the last date when the price is below par and at the earliest date when the price is above par.

(2) Averages of daily figures calculated from middle market closing prices.

(3) Representative securities, changed from time to time:

Short dated (about 4 years), 4½% Conversion stock 1964 in 1960 and 1961; 5½% Exchequer stock 1966 in 1962; 5% Exchequer stock 1967 in 1963 and 1964; 3½% Conversion stock 1969 from January 1965.

Medium dated (about 8-12 years), 3% Funding stock 1966-68 in 1960; 5% Conversion stock 1971 in 1961 to 1963; 5½% Conversion stock 1974 in 1964 and 1965; 5% Exchequer stock 1976-78 from January 1966.

Long dated (about 18-25 years), 3½% Treasury stock 1979-81 in 1960 to 1963; 3% British Transport stock 1978-88 in 1964 and 1965; 5% Treasury stock 1986-89 from January 1966.

(4) Gross redemption yields of 15 stocks so combined as to give a yield average for a constant 20-year term.

	March	...	...	...	...	...	...

(<sup>1</sup>) This index is compiled from the results of a monthly enquiry into the earnings of weekly-paid and monthly-paid employees. This enquiry was fully described in the *Ministry of Labour Gazette* for April 1963, with supplementary details in the March 1964 issue.

(<sup>2</sup>) The enquiry covers about 8,000 firms employing approximately 7 million persons in manufacturing, mining and quarrying, construction, gas, electricity and water supply, some miscellaneous services and some branches of the transport industry. (London Transport was included from August 1963). In addition figures for Agriculture are supplied by the Ministry of Agriculture, Fisheries and Food, and the Department of Agriculture and Fisheries for Scotland.

(<sup>3</sup>) To convert to a weekly basis, earnings of employees paid monthly have been multiplied by 12 and divided by 52.

(<sup>4</sup>) Figures relate to the last pay-week in the month.

(<sup>5</sup>) Figures relate to calendar months.

Note: Fluctuations from month to month in the indices may be due to the payment of large annual or half-yearly bonuses, or to seasonal changes in average hours worked; e.g. variations due to the payment of Christmas and 'end-of-year' bonuses are particularly noticeable in the December figures for employees paid monthly.

(<sup>1</sup>) The figures represent the average earnings, including bonus, overtime, etc., and before deduction of income tax or insurance contributions, in one week in the months indicated. Administrative and clerical workers and other salaried persons have been excluded. Certain qualifications are given in a full account of the enquiry relating to October 1964, published in the *Ministry of Labour Gazette* for February 1965.

(<sup>2</sup>) This index relates only to the industries covered by the earnings enquiry. It should not be confused with the figures in Table 159 which cover all industries.

(1) The figures are based on rates and hours at the end of the month. An account of the method of compilation of the figures is given in the current issue of the Ministry of Labour Gazette.

Source: Ministry of Labour

(2) In general, males under 21 and females under 18 years of age.

(3) The term 'Manufacturing industries' covers all industries included in Orders III-XVI of the revised Standard Industrial Classification, 1958.

(<sup>1</sup>) The figures relate to changes in basic full-time weekly rates of wages and do not reflect reductions in normal weekly hours without loss of pay or variations in actual earnings arising from such factors as overtime or lost time. The changes included are, in the main, those arranged by organisations of employers and workpeople or by statutory wages councils or boards. It is estimated that 14 million workers are covered by these statistics. In general, changes arranged by individual employers are excluded.

Source: Ministry of Labour

(<sup>2</sup>) The monthly totals in the columns headed 'Increase' and 'Decrease' relate to the number of workpeople affected by changes and the corresponding gross amounts. Workpeople affected by two or more changes are counted only once in the annual totals which relate to the number having increases only or for whom increases exceeded decreases, the number having decreases only or for whom decreases exceeded increases, and the corresponding net amounts; the column headed 'Net increase' is therefore the overall net increase for the year.

(<sup>3</sup>) The annual totals of net increases in basic weekly rates of wages mean that the total wage bill of the country, in the industries and for the workpeople covered by the statistics, for a full ordinary week's work at basic rates of wages at the end of any one year exceeds that for the corresponding week of the preceding year by the amount stated. The average weekly wages paid during any one year will not, however, exceed those paid during the preceding year by this sum, as the actual changes will have taken place at various dates during the year.

Index of retail prices<sup>(1)</sup>

(1) The index of retail prices replaced the Interim index from January 1956. A new set of weights was introduced, based on ascertained consumption in 1953-54, valued at January 1956 prices. Commencing in January 1962, the weights have been revised each January on the basis of ascertained consumption in the three years ended in the previous June, valued at prices obtaining at the date of revision.

(3) Index of building costs; figures relate to average for the quarter.

(4) Based on prices ruling on the last day of each month.

(5) The index covers only houses on which building societies have advanced mortgages during the period. The cost of land is included.

(6) Revised figures from January 1963.

(1) The weighting of the monthly index is based on the pattern of trade in 1961. The method of calculating the import and export unit value index was explained in the *Board of Trade Journal* for 13 September 1963.

(2) The index numbers for years before 1960 which were based on 1952 = 100 have been linked to the new series 1960 = 100 to give an approximate comparison.

(3) Export unit value index as a percentage of the import unit value index.

(1) Based on manufacturers' list prices.

(2) The market-price series are based on prices before the addition of subsidies paid to producers under the Cereals Deficiency Payments Scheme and Fatstock Guarantee Scheme.

(3) The gross-price series for wheat, cattle and pigs are based on prices after the addition of subsidies paid to producers; those for milk and eggs on prices paid to producers by the marketing boards for these commodities; and that for potatoes on producer prices, sometimes 'supported' by the Potato Marketing Board.

(4) Maincrop potatoes only.

(5) Based on guaranteed minimum prices to producers at packing stations.

(6) Based on net prices to farmers after deduction of subsidy.

(1) Great Britain. Figures until June 1959 are based on quarterly returns from virtually all cinemas. From July 1959 onwards, figures are estimates based on information relating to a sample of cinemas.

Sources: General Post Office  
Board of Trade

(2) Manufacturers' sales exclusive of purchase tax.

(3) Including medium play and a small number of other types.

\* Average of five weeks.

# XIX. WEATHER

## Temperature, rainfall and sunshine

# Financial Statistics

This monthly publication is prepared by the Central Statistical Office in collaboration with the statistical divisions of other government departments and the Bank of England. It brings together in a convenient form the key financial and monetary statistics of the United Kingdom, many of which are not published elsewhere. It contains up-to-date monthly and quarterly statistics on the sources and uses of funds of the central government, local authorities, public corporations, banks, building societies, insurance companies and other financial institutions and industrial and commercial companies. It also gives information about capital issues, stock exchange transactions, interest rates and the balance of payments.

*Financial Statistics* contains over 100 pages of tables covering the following subjects:

FINANCIAL ACCOUNTS  
EXCHEQUER AND CENTRAL GOVERNMENT  
LOCAL AUTHORITIES  
PUBLIC CORPORATIONS  
BANKS AND BANKING INSTITUTIONS  
BUILDING SOCIETIES  
UNIT AND INVESTMENT TRUSTS  
INSURANCE COMPANIES AND SUPERANNUATION FUNDS  
OTHER FINANCIAL INSTITUTIONS  
COMPANIES  
CAPITAL ISSUES AND STOCK EXCHANGE TRANSACTIONS  
INTEREST RATES AND SECURITY PRICES  
OVERSEAS FINANCE

*Financial Statistics* will be of interest not only to those who deal with financial matters in their daily business, but to all concerned with monetary and economic affairs.

A separate supplement, *Financial Statistics: Notes and definitions* was published with the April issue. It provides detailed definitions of the terms used and the coverage of the series (price 3s. 6d.).

Price per copy 10s. 6d. (by post 11s. 2d.)

Annual subscription £6 14s. 0d. including postage
